Education

The University of Texas at Austin | August 2016 – August 2020

- Bachelor of Science and Arts in Mathematics
- Elements of Computing Certificate

Experience & Projects

Audify | May 2020 – July 2020

iOS Developer

- Created an iOS Application which allowed users to scan pieces of text and effectively create an audiobook with the input text.
- Used libraries available in the iOS development kit such as the VisionKit as well as a Google text-to-speech API to implement desired features.

foodmoodtogo.me | January 2020 – May 2020

Team Lead/ Full Stack Developer

- Led team and coordinated dev cycle to efficiently create a website displaying recipes scraped from a meal API.
- Used tools like git, flask, Bootstrap, Google Cloud Platform, PostgreSQL on CloudSQL to create a website that displayed dynamic web elements.

simpleart.biz | October 2019 – Present

Front-End Developer

- Built a website for a construction company to display work that they previously performed, allowing potential customers to view their work portfolio and increasing potential client pool and revenue.
- Designed the company logo, business card, and created an advertisement using Adobe Illustrator to be placed on company vehicles allowing for more exposure.

Kershner Trading Group | February 2019 – May 2019

Software Development Engineer Intern

- Helped with the development of tools used by traders in the firm, empowering them to make more effective trades.
- Learned to work in an ambiguous work environment and to seek the desired solution to the problem.

SpotiPy | August 2018 – December 2018

Front-End Developer

- Designed new and modified existing front-end elements using Bootstrap to display detailed information.

Skills

Python, Swift, Xcode, Flask, HTML, CSS, PostgreSQL
